ABOUT US

We offer quality products that meet the challenging industrial specifications and needs. These specifications are as per the clients requirements and at affordable prices. Our commitment to provide premium quality products to our valued clients has helped us to excel and achieve perfection. Being a quality conscious organization we procure our raw material from the most trusted vendors and ensure customer satisfaction at all levels and at any cost. Our quality check unit is well equipped and is manned by special professionals who scrutinies every production step very carefully and ensures that the product matches the set parameters. Our range of products are available in different weights and sizes and as per the requirement. We also provide customized products to our clients who demand give us exact specifications of their requirements.

We can proudly boast of a large, well equipped infrastructure, providing different divisions for manufacturing processes, warehousing, research & development and many more. The spacious warehousing division helps us to meet that bulk demand of our clients within the required time frame. Our research & development infrastructure helps us conduct newer methodologies, and experiment with innovative ideas. We indulge in market surveying to keep ourselves updated with industry standards and latest requirement. With the help of experts we have fabricated and developed products that are of high-quality and possess high end features. Owing to their features and wide usage our products speak for themselves and create a huge demand. Not being complacent we are planning to add more features to our products to make them more suitable and applicable to your needs and specifications.

'Mr. Pinakin Panchani' (Manager) is our mentor and guide, who has always been the source of inspiration for all of us.

PRODUCT

MACHINE SCREW

Diameter Range :	M4, 5/32, 3/16, 1/4, 5/16
Length :	13mm to 75mm
Threads Type :	BSW, MM Type
Material :	Stainless Steel and Mild Steel (MS) also as per Customer Requirements
Standard :	DIN, ISO

COMBINATION HEAD MACHINE SCREW

Diameter Range :	M4, 5/32, 3/16
Length :	13mm to 50mm
Threads Type :	BSW, MM Type
Material :	Stainless Steel and Mild Steel (MS) also as per customer Requirements
Standard :	DIN-SS-7985, DIN-MS-7970, ISO

CSK SELF TAPPING S.S. SCREW

Diameter Range :	4# to 12#
Length :	13mm to 100mm
Threads Type :	[AB] type and [B] type
Material :	Stainless Steel and also as per customer Requirements
Standard :	DIN, ISO

DIN - 7982

DIN - 7972

PAN SELF TAPPING S.S. SCREW

Diameter Range :	4# to 12#
Length :	13mm to 100mm
Threads Type :	[AB] type and [B] type
Material :	Stainless Steel and also as per customer Requirements
Standard :	DIN, ISO

DIN - 7981

DIN - 7971

CSK SELF TAPPING METAL SCREW

Diameter Range :	2# to 12#
Length :	6.5mm to 100mm
Threads Type :	[AB] Type and [B] Type
Material :	Mild Steel (MS) and also as per customer Requirements
Standard :	DIN, ISO

DIN - 7982

DIN - 7972

PAN SELF TAPPING METAL SCREW

Diameter Range :	2# to 12#
Length :	6.5mm to 100mm
Threads Type :	[AB] Type and [B] Type
Material :	Mild Steel (MS) and also as per customer Requirements
Standard :	DIN, ISO

DIN - 7981

DIN - 7971

CSK S.S. WOOD SCREW

Diameter Range :	4# to 12#
Length :	13mm to 100mm
Threads Type :	[AB] type
Material :	Stainless Steel and also as per customer Requirements
Standard :	DIN, ISO

DIN - 7998

DIN - 7997

DRYWALL SCREW

Diameter Range :	3.5# to 4.2#
Length :	13mm to 75mm
Threads Type :	(AB) type and (B) type
Material :	Stainless Steel and Mild Steel (MS) also as per Customer Requirements
Standard :	DIN-7990, ISO

HILUX SDS SCREW

Diameter Range :	3.5# to 4.2#
Length :	13mm to 75mm
Threads Type :	BSD Thread
Material :	Mild Steel (MS) and also as per Customer Requirements
Standard :	DIN-7504 P, ISO

HEX HEAD SCREW

Diameter Range :	4.2# to 6.3#
Length :	25mm to 125mm
Threads Type :	BSD Thread
Material :	Mild Steel (MS) and also as per Customer Requirements
Standard :	DIN-7504 K, ISO

QUALITY ASSURANCE

We understand the importance of quality and consider it as a very important link between us and our valued clients. To ensure that we remain connected to clients we take every step to ensure quality in every aspect. Our quality checks & controls division is very well developed and is installed with the latest technology. Such a well organised quality check set up helps us to offer flawless products and keeps our customers satisfied. Well qualified and highly trained quality inspectors are hired to supervise the entire quality check procedure.

CLIENT SATISFACTION

Being a client-centric organisation, we attempt to satisfy our clients at all costs. We don't offer products randomly and plan each product as per the customer requirement and need. A well developed infrastructure installed with the latest technology helps us to offer quality products and maintain a satisfied clientele. Our stringent quality policy has earned us a lot of appreciation and trust from our customers. We use premium quality raw material procured from the most trusted sources to make sure that we match the standards our clients expect.
